# Morpho, Inc. introduces "Morpho Object Eraser™" Technology for removing moving object

Tokyo, Japan - **October 4, 2012** – Morpho, Inc., a global leader in software image processing solutions for mobile devices, released "Morpho Object Eraser™."   This product utilizes a technology which detects moving objects and removes them easily and leaving only the still objects.

Morpho Object Eraser

　"Morpho Object Eraser™"is a technology, which detects and removes moving objects from continuously captured images and leaves only the still objects. By comparing 5 to 15 consecutive frames, it detects moving objects, removes them, and replaces them with background. Also, "Morpho Object Eraser™"allows users to choose a specific moving object from automatically detected moving objects and remove them. "Morpho Object Eraser™"uses Morpho's original motion detection technology "SOFTGYRO®" to compensate hand jitters which occurred during image capture.

Continuously Captured Images
