

Morpho, Inc. Announces License of Morpho Panorama to Samsung

Tokyo, Japan - September 26, 2013 – Morpho, Inc., a global leader in software image processing solutions for mobile devices, today announced that it has licensed its software to Samsung Electronics Co., Ltd., hereafter Samsung, for use in its smartphones. Morpho's panorama image generation software, "Morpho Panorama™" will provide wide-angle panorama image capture capabilities to Samsung's customers worldwide. Morpho's software will be bundled in Samsung's Android™ smartphones starting with their new model GALAXY Note 3.

About the Products

Morpho Panorama™

By moving the camera up and down, right and left or following the guide, "Morpho Panorama™" generates a wide-angle panorama picture with sense of immersion. Normally, simply stitching together pictures taken with a camera freely moving around does not result in natural picture due to depth difference between pictures. However, "Morpho Panorama" estimates the depth to create input images adjusted to the distance. It then stitches them together to generate a more natural wide angle panorama picture.

* "Morpho Panorama" is a trademark of Morpho, Inc.

* "Android" is a trademark or registered trademark of Google, Inc.
