

“Morpho Panorama Selfie,” a software product that realizes selfie with wide-angle panorama featured for ASUS ZenFone Selfie

Tokyo, Japan – June 12, 2015 – Morpho, Inc., a global leader in mobile image processing solutions, announced today that "Morpho Panorama Selfie," a software which realizes a selfie with wide-angle panorama, is officially featured for ASUS™ Zenfone Selfie.

About the Product

Morpho Panorama Selfie™

"Morpho Panorama Selfie" is a software product which enables users to shoot a selfie with wide-angle panorama. This software takes each frame of a movie or series of still images with a front camera as an input, and generates a wider angle image in which, for a natural selfie, Morpho's face detection technology is applied to avoid stitching on face.

The detailed functions of its panorama technology are :

- Enabling high resolution output by merging still images
- Achieving natural stitching by precise image alignment
- Correcting luminance to create a stunning shot
- Processing at high speed for high resolution panorama image generation

*"Morpho Panorama Selfie" is a trademark of Morpho, Inc.
