Morpho's Software 『Morpho Panorama Giga Pixel™』 Featured in LG G6 of Flagship Smartphone

April 28, 2017

Morpho, Inc. ("hereafter Morpho"), a global leader in software image processing solutions for mobile devices, today announced that it has licensed its software to LG Electronics Inc. ("hereafter LG"), for use in its smartphones. Morpho's panorama image generation software, 『Morpho Panorama Giga Pixel™』 will provide 360 degrees of panorama image capture capabilities to LG's customers worldwide. Morpho's software will be bundled in LG's Android™ smartphones starting with their new model LG G6.

About 『Morpho Panorama Giga Pixel™』

By moving the camera right and left or following the guide, 『Morpho Panorama Giga Pixel™』 generates a 360 degrees of panorama picture with sense of immersion. This software will offer smooth capturing experience for taking 360 degrees sphere-panoramic image, it's simply take video of your surrounding in a circle. With a supported viewer, you can pan left and right and up and down as if you were actually standing there and looking around.
